

FOR IMMEDIATE PRESS RELEASE

**GEOVAX LABS, INC. INFORMATION TO BE AVAILABLE THROUGH
STANDARD & POOR'S MARKET ACCESS PROGRAM**

ATLANTA – October 1, 2008 – GeoVax Labs, Inc. (OTCBB:GOVX), an Atlanta biopharmaceutical company developing human vaccines for diseases caused by HIV-1 (Human Immunodeficiency Virus) and other infectious agents, announced today that its company information will be made available via Standard & Poor's Market Access Program, an information distribution service that enables subscribing publicly traded companies to have their company information disseminated to users of Standard & Poor's Advisor Insight. The company information to be made available through this program includes share price, volume, dividends, shares outstanding, company financial position, and earnings. Standard & Poor's Advisor Insight is an Internet-based research engine used by more than 100,000 investment advisors. A public version of the site is available at <http://www.advisorinsight.com>.

In addition, information about companies in Standard & Poor's Market Access Program will be available via S&P's Stock Guide database, which is distributed electronically to virtually all major quote vendors. As part of the program, a full description of GeoVax Labs, Inc. will also be published in the Daily News section of Standard Corporation Records, a recognized securities manual for secondary trading in approximately 38 states under their Blue Sky Laws.

About GeoVax Labs, Inc.

GeoVax Labs, Inc. is a biotechnology company, established to develop, manufacture, license and commercialize human vaccines for diseases caused by HIV-1 (Human Immunodeficiency Virus) and other infectious agents. GeoVax's AIDS vaccine technology is the subject of 20 issued or filed patent applications. GeoVax AIDS vaccines are designed for use in uninfected people to prevent Acquired Immunodeficiency Disease (AIDS), caused by the virus known as HIV-1, should the person ever become infected. GeoVax AIDS vaccines also may be effective as therapeutics, treatment of people already infected with AIDS virus.

GeoVax's core AIDS vaccine technologies were developed by Dr. Harriet Robinson, Senior V.P. of Research and Development, through a collaboration of colleagues at Emory University's Vaccine Center, the National Institutes of Health (NIH), The Centers for Disease Control and Prevention (CDC) and GeoVax.

GeoVax AIDS vaccines have moved forward in human clinical trials conducted by the HIV Vaccine Trials Network (HVTN) based in Seattle, Washington. The HVTN, funded through a cooperative agreement with the National Institutes of Health (NIH), is the largest worldwide clinical trials program dedicated to the development and testing of AIDS vaccines. Preclinical work enabling evaluation of GeoVax DNA and MVA vaccines was funded and supported by NIAID, which provided additional support to GeoVax AIDS vaccine development program with a \$15 million IPCAVD grant awarded in late 2007.
