

## **GeoVax to Report Third Quarter 2020 Financial Results on Thursday, November 5, 2020 and Provide Corporate Update**

*Conference call to be held Friday, November 6, at 8:15 a.m. Eastern Time*

**ATLANTA, GA, October 30, 2020 – GeoVax Labs, Inc.** (NasdaqCM: GOVX, GOVXW) (“GeoVax” or the “Company”), a biotechnology company developing human immunotherapies and vaccines against infectious diseases and cancer, announces today that it plans to report third quarter 2020 financial results on Thursday, November 5, 2020 after the market closes.

Management will host a conference call at 8:15 a.m. ET on Friday, November 6, 2020 to review financial results and provide an update on corporate developments. Following management’s formal remarks, there will be a question and answer session.

Participants are asked to pre-register for the call via the following link:

<https://dpregrister.com/sreg/10149661/dc8783c368>

Please note that registered participants will receive their dial-in number upon registration and will dial directly into the call without delay. Those without Internet access or who are unable to pre-register may dial in by calling 1-866-777-2509 (domestic) or 1-412-317-5413 (international). All callers should dial in approximately 10 minutes prior to the scheduled start time and ask to be joined into the GeoVax Labs call.

The conference call will be available through a live webcast found here:

<https://services.choruscall.com/links/govx201106.html>

A webcast replay of the call will be available approximately one hour after the end of the call through February 6, 2021. The webcast replay can be accessed through the above links or by calling 1-877-344-7529 (domestic) or 1-412-317-0088 (international) and using access code 10149661. The telephonic replay will be available until November 20, 2020.

### **About GeoVax**

GeoVax Labs, Inc. is a clinical-stage biotechnology company developing human vaccines against infectious diseases and cancer using a novel patented Modified Vaccinia Ankara-Virus Like Particle (MVA-VLP) based vaccine platform. On this platform, MVA, a large virus capable of carrying several vaccine antigens, expresses proteins that assemble into VLP immunogens within (*in vivo*) the person receiving the vaccine. The production of VLPs in the person being vaccinated mimics virus production in a natural infection, stimulating both the humoral and cellular arms of the immune system to recognize, prevent, and control the target infection. The MVA-VLP derived vaccines elicit durable immune responses in the host similar to a live-attenuated virus, while providing the safety characteristics of a replication-defective vector.

GeoVax’s current development programs are focused on preventive vaccines against COVID-19, HIV, Zika Virus, hemorrhagic fever viruses (Ebola, Sudan, Marburg, and Lassa), and malaria, as well as therapeutic vaccines against multiple cancers. The Company has designed a preventive HIV vaccine candidate to fight against the subtype of HIV prevalent in the commercial markets of the Americas, Western Europe, Japan, and Australia. Human clinical trials for this program are managed by the HIV Vaccine Trials Network (HVTN) with the support of the National Institutes of Health (NIH). GeoVax’s HIV vaccine candidate is also part of two separate collaborative efforts to apply its innovative gene therapy approach toward a functional cure for HIV.

### **Cautionary Note Regarding Forward-Looking Statements**

*This release contains forward-looking statements regarding the timing of the release of GeoVax's financial results and earnings conference call and the earnings release and call are expected to discuss forward-looking statements regarding GeoVax's ability to implement its business plan, expected revenues and future success. The words "believe," "may," "estimate," "continue," "anticipate," "intend," "should," "plan," "could," "target," "potential," "is likely," "will," "expect" and similar expressions, as they relate to us, are intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. Actual results may differ materially from those included in these statements due to a variety of factors, including whether: GeoVax can develop and manufacture its vaccines with the desired characteristics in a timely manner, GeoVax's vaccines will be safe for human use, GeoVax's vaccines will effectively prevent targeted infections in humans, GeoVax's vaccines will receive regulatory approvals necessary to be licensed and marketed, GeoVax raises required capital to complete vaccine development, there is development of competitive products that may be more effective or easier to use than GeoVax's products, GeoVax will be able to enter into favorable manufacturing and distribution agreements, the impact of the COVID-19 pandemic continues, and other factors, over which GeoVax has no control.*

*Further information on our risk factors is contained in our registration statement on Form S-1 (File No. 333-239958) that we have filed with the SEC and the final prospectus. Any forward-looking statement made by us herein speaks only as of the date on which it is made. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.*
